Universal Service/Network Democracy

Participant Information

The original goal of the seminar was to bring together approximately 250 people, with a broad geographic distribution and strong representation from people experienced in the applications of networking technology in our nation's schools and libraries. This goal was exceeded even before the seminar began on August 26, and enrollment continues to expand. The pointers below are meant to help you navigate through the wealth of material contained in the participants' registration forms.

- Participants arranged by date of registration
- Participants arranged by name
- Participants arranged by state and city

If you have not registered and would like to do so, you can use our on-line registration form. If your Web browser cannot handle Web forms, you can also request a form by electronic mail by writing to info@info-ren.pitt.edu.
